**Subject:** RE: Question Regarding Coverage of Live Scan Request

Dan,

No, the search is obtained from fingerprint submissions, reported arrests and convictions, but not the actual Sex Offender Registry. That is a separate database outside of the fingerprint response dissemination. However, the particular offense which warranted inclusion in the sex offender registry may still appear on the response to a fingerprint background check, depending on the particular requesting agency's dissemination criteria.

Hope that answers your question.

Regards,
